**Digitale Transformation in
der Gefahrenabwehr**

Junior Projektmanager (m/w/d) „Digital transformation for safety“

Full-time / possibility of part-time

Become part of our team in **Paderborn** and advance the "Digital transformation for safety". We offer an open atmosphere, varied tasks and plenty of opportunities for personal development. We look forward to meeting you!

Security can and should benefit from technological developments and especially from the digital transformation! To achieve this, we believe that the ever-increasing technological potential must be harmonised with the changing needs of emergency response.

That is our vision!

Your tasks include:

- Structuring and compressing large contexts into specific questions
- the continuous exchange of project content with different stakeholders based on the current state of science and technology
- the written and visual presentation of project content
- project management (e.g. initiation and coordination of project content, project documentation)
- the target group-orientated external presentation of project content
- the preparation of national and international project applications

We offer you:

- diverse challenges in national and international research projects
- with exciting partners such as fire brigades, aid organisations etc.
- the opportunity to realise your own visionary ideas
- the opportunity to attend national and international conferences
- an open atmosphere in a small, young and efficient team
- flexible working hours and the option of mobile office
- an attractive salary
- a modern penthouse in the centre of the city with a great view over Paderborn
- excellent transport connections
- modern office equipment: personal laptop with desired operating system, height-adjustable desks, extra screens, customised equipment and air conditioning
- an office kitchen with extensive equipment
- regular barbecues on our own roof terrace

What we expect:

- a university degree in one of the following degree programmes: (business) informatics, business administration, (business) engineering or a comparable degree programme
- Several years of professional experience within (IT) projects preferred
- Enthusiasm for scientific work with practical relevance
- Enjoy teamwork
- IT affinity
- Very good analytical skills and a high level of communication and moderation skills
- Willingness to take on responsibility
- Visionary thinking, motivation and reliability
- Quality awareness and a structured way of working
- very good written and spoken German and English skills
- Willingness to occasionally travel on business
- Previous knowledge in the field of security and programming is desirable
